satya prakash Mohanty

+91 9668234042 | dssatyaprakash@gmail.com | Odisha , India | LinkedIn | Portfolio | GitHub

Key Skills

Programming & Data Handling: Python (Pandas, NumPy), SQL

Machine Learning: Linear Regression, Polynomial Regression, Logistic Regression, Decision Trees, Random Forest, Support Vector Machines, k-Nearest Neighbor, Gradient Boosting Clustering & Dimensionality Reduction: K-Means, Hierarchical Clustering, DBSCAN, PCA

Deep Learning: Deep Learning & Computer Vision: CNNs, ResNet50, Transfer Learning, Image Classification, TensorFlow, Keras, PyTorch

Tools: (Scikit-learn, PyTorch)

Data Visualization: Matplotlib, Seaborn

MLOps & Deployment: Streamlit, github

Databases & Tools: MySQL

Other Skills: Web Scraping (Requests, BeautifulSoup), Feature Engineering, Model Evaluation (AUC, Precision, Recall, F1-score)

Professional Experience

BCG Data Science Job Simulation – Forage **Virtual**

Data Scientist (Internship) May 2026 - Jun 2026

- Successfully completed the BCG Data Science Job Simulation on Forage. Analyzed customer churn patterns, identified key factors influencing customer retention, developed actionable business insights, and presented findings through an executive summary.

Skills: Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Data Visualization, Customer Churn Analysis, Business Analytics, Data Storytelling, Executive Reporting, Problem-Solving.

AtliQ technologies **Virtual**

Data Scientist (Internship) Aug 2025 - Sep 2025

- Performed data cleaning and preprocessing, improving dataset reliability for analysis and modeling. Engineered features that improved model accuracy by ~12% and reduced prediction error. Successfully deployed a machine learning model, ensuring real-world applicability and scalability. Collaborated on client projects in the Food & Beverage domain, delivering actionable data-driven insights. Demonstrated strong problem-solving, analytical, and teamwork skills in a professional environment.

Projects

HR Department - **Human Resources / HR Analytics** **Project Link**

[[Python, Pandas, NumPy, Scikit-learn | EDA | Machine Learning | Data Visualization]] Aug 2026 - Aug 2026

- Analyzed HR data using preprocessing, EDA, feature engineering, and visualization to identify key performance factors.
- Built and evaluated ML classification models to predict employee performance and support data-driven decisions.

COVID-19 & Pneumonia Detection - **Healthcare / Medical Imaging** **Project Link**

[[Python, TensorFlow/Keras, OpenCV | Computer Vision | CNN | Image Classification | Data Augmentation]] Aug 2026 - Sep 2026

- Built a CNN model to classify chest X-rays into COVID-19, Normal, Viral Pneumonia, and Bacterial Pneumonia.
- Applied image preprocessing, normalization, augmentation, and evaluated model performance using Accuracy, Precision, Recall, and F1-Score.

Car Damage Detection - **Industry / Application Domain** **Project Link** **Presentation Link**

[Python, TensorFlow/Keras, Computer Vision, CNNs, Transfer Learning, ResNet50, Image Classification, Streamlit] Dec 2025 - Dec 2025

- Car Damage Detection POC
- Built ResNet50-based model to classify six car damage types from ~1,700 images.Used preprocessing and augmentation to boost accuracy.Achieved 80% validation accuracy (target 75%).Deployed interactive Streamlit app for image-based damage prediction.

Health Insurance Cost Predictor - **Healthcare / Insurance** **Project Link** **Presentation Link**

[Python, Pandas, NumPy | Scikit-learn, Statsmodels | EDA, Feature Engineering | Linear/Ridge/Lasso | Model Evaluation | Visualization] Aug 2025 - Present

- Developed Linear, Ridge, and Lasso regression models with cross-validation to predict insurance premiums.Conducted exploratory data analysis, feature engineering, and VIF analysis to address multicollinearity.Identified key factors (age, BMI, smoking status) driving premium pricing.Provided actionable insights to improve pricing transparency and support underwriting decisions.

Credit Risk Modelling - **Finance, Risk Analytics, and Machine Learning** **Project Link** **Presentation Link**

[Python, Scikit-learn, XGBoost | EDA, Feature Engineering, SMOTE | Model Evaluation] Aug 2025 - Present

- Built an end-to-end ML pipeline (EDA, feature engineering, model training, and evaluation) to predict loan default risk.Implemented Logistic Regression, Random Forest, and XGBoost with hyperparameter tuning, improving ROC-AUC and reducing misclassification rates.Delivered actionable insights using SHAP & feature importance, supporting credit policy decisions and reducing portfolio default risk.

Certifications

- **BCG Data Science Job Simulation - BCG-Forage**
  Issued on: Jun 2026 [Certification Link]
- **IBM Data Science Professional Certificate - IBM**
  Issued on: Aug 2026 [Certification Link]

Education

Xavier Institute of Technology **Bhubaneswar**
Bachelor of Technology - Electronics & Communication Jul 2013 - Jul 2016
